U. S. Department of Agriculture

Our Nurseries are located at convenient points for reaching the planters of the South, Mexico, Cuba and the Islands, enabling us to deliver our trees and plants to the communities and sections now making the most rapid progress in fruit and nut culture and general horticultural development the world has ever known, quickly and in the most perfect condition.

The climate and soil at our several nurseries is such that we can produce the best, healthiest and most perfect trees and plants adapted to the climate and soil of the territory we seek to serve,—whether tender trees and plants for Tropical Florida and Texas, Cuba and Mexico, or the semi-tropic and temperate-climate fruit, nut and ornamental trees and shrubbery for the Gulf Coast sections and the Cotton Belt.

Our Nurseries and Territory
We Seek to Serve

New Departures

Transportation Prepaid

Liberal Guarantee. Premiums for Results

We grow all the trees and plants that we offer, and grow them with a view to the results they will ultimately give in the orchards and gardens of our customers,—in nurseries conveniently located throughout the South, where soil and climate, combined with expert knowledge and careful supervision, make possible the production of the best, healthiest and most vigorous trees obtainable. These we are able to deliver to our customers with transportation charges fully prepaid, with privilege of examination, with a liberal guarantee, and a premium for best results.

TRANSPORTATION CHARGES PREPAID. On individual or club orders amounting to two dollars (\$2) or more at prices herein quoted, we will prepay transportation charges, either by mail, express or freight, at our discretion, to any point within the southern states. Orders for less than two dollars (\$2) will be shipped collect.

PRIVILEGE OF EXAMINATION. Orders sent direct to the Nurseries amounting to five dollars (\$5) or more at prices herein quoted, accompanied by one-fourth the amount of order, to insure us of good faith, will be shipped subject to examination before they are accepted, with privilege of returning and having advance payment refunded, if not found to be as represented in our price-list and catalog; the remaining three-fourths to be paid when goods are accepted. Cash in full should accompany all orders for less than five dollars (\$5).

GUARANTEE OF ARRIVAL, GENUINENESS AND VIGOR. All trees and plants purchased at prices herein quoted are guaranteed to reach our customers in good condition for transplanting, and to live and grow for a period of one year, under the specific understanding and agreement between the purchaser and the Nursery, that the purchaser will prepare the soil, plant and care for the trees in accordance with the instructions furnished by the Nursery, and that if any of the trees fail to grow, or should die within a period of one year, from any cause other than freeze, flood, fire, chemical, mechanical or animal injury, or gross neglect, the Nursery will replace them at one-half the list price as herein quoted for said trees. Should any of the trees or plants at any time prove untrue to

ORDER STOCK FROM OUR NURSERY NEAREST YOU

label, other trees will be furnished to replace same, or the original amount paid be refunded, at option of purchaser, which adjustment the purchaser agrees to accept in full settlement of any claim against Nursery on account of said trees.

PREMIUM FOR RESULTS. We are not alone interested in getting trees to our customers and our money for them, but in their ultimate results. To encourage interest and care on the part of our customers and the planters of our trees, we offer a premium of ten per cent (10%) of amount of his order, payable in trees and plants at list prices, to any customer reporting every tree living and growing. We also offer a **CASH PREMIUM** of ten per cent (10%) of amount of your order for each of the twenty-five (25) best photographs showing results from trees furnished by us with a twenty-five dollars (\$25) cash bonus for the best picture and statement relative to trees and ten dollars (\$10) each for the five next best. These prize offers apply to fruit, nut, ornamental trees, shrubbery or roses purchased either this year or previously.

APPLICATION OF PRICES. Five, fifty and five hundred trees or plants of one class at ten, hundred and thousand rates, respectively, purchasers' selection of varieties from one fruit or class of plants having a common price. For instance, fifty or more peaches having a common price, in one or more varieties, would come at hundred rates, and five hundred or more at thousand rates.

NO CHARGE FOR PACKING OR PACKAGES. Our packing is done in the most careful manner, in neat boxes or packages, for which no charge is made.

SUBSTITUTION. When out of varieties or sizes ordered, we substitute, unless instructed to the contrary, always giving the purchaser the benefit of our best judgment in so doing. In all cases we will cheerfully refund money instead of substituting, if so requested.

NO ORDER FILLED FOR LESS THAN ONE DOLLAR. Owing to high minimum freight and express charges, making the proportionate cost of trees and plants in small orders excessive, and, as a rule, unsatisfactory to our customers, and to the fact that our expense in filling orders for less than one dollar (\$1) is as great as on much larger orders, we have been obliged to make a rule to fill no orders for less than **ONE DOLLAR.**

Griffing's Price Catalogue

Season 1911 and 1912

The prices in this list are for the trees and plants by mail, express or freight prepaid, with a liberal guarantee, with privilege of examination and with valuable premium offer, as per terms on pages 3 and 4 of this list.

Do not confuse these prices with prices of cheap trees and plants of questionable quality offered by parties without financial or trade standing. Bear in mind that in no line of purchases is the possibility of mistake so great as in trees and plants. Trees may look well, yet lack the vigor to insure a successful planting; they may be healthy and vigorous, make fine tree specimens, yet, after years of labor, care and waiting, prove untrue to label and of a worthless variety; you find the guarantee, if one was given, valueless, as party is either out of business or is irresponsible. You pay in bitter experience far more than the difference you would have paid us for our guaranteed trees.

As to our responsibility, look us up. We refer you to the commercial agencies, boards of trade, or any bank or responsible business house in Jacksonville, or Miami, Florida, Port Arthur, Beaumont, Brownsville or McAllen, Texas. We have nearly half a million invested in the business, and are making it a life work.

Neither confuse these prices with those of nurseries, even though responsible and offering good trees and plants, who give no tangible guarantee, who require you to send full amount of order in advance of the shipment, and that you accept the trees as they may pack them, whether good or bad, and turn them over to transportation company who give no assurance that you will ever receive them, or that they will be in good planting condition upon arrival.

Our trees and plants at prices quoted in this list are shipped fully prepaid, with a guarantee that you will receive them in good condition, and that they will grow and prove true to name, or true to the variety for which they were sold. In buying from us you know just what your trees will cost, avoid the risk of careless, haphazard packing, loss and damage in transit.

Buy trees and plants grown to give results and sold on merit. We want the orders of the careful, painstaking planters, who will give the trees and plants the same careful attention, who will love and nourish them as we have loved and nourished them in the nursery. Our trees may cost a little more, but superior quality, free delivery, and liberal guarantee, make them cheapest in the end.

Citrus Fruits

ORANGES, POMELO (GRAPEFRUIT), AND OTHER CITRUS FRUITS

Hardy Citrus Fruits

For the heavier soils in central, northern and western Florida, the immediate coast section of South Carolina, southern Georgia, Alabama, Mississippi, Louisiana and southeast Texas, we recommend all citrus fruits budded on the *Citrus trifoliata* roots, which we classify and list as **Hardy Citrus Fruits**.

Our hardy Citrus trees are grown at, and will usually be shipped from, our Jacksonville, Fla., and Port Arthur, Texas, Nurseries.

Prices for Hardy Citrus Fruits, including the Satsuma and standard varieties of Orange, Grapefruit, Lemon and Lime Trees. See Descriptive Catalog for varieties.

Seedling Pomelo (Grapefruit) Trees

Some of the finest, most profitable Pomelo (Grapefruit) groves in Florida are the old seedling groves. If unable to plant the improved budded sorts, plant the seedling trees, they will not disappoint you. A seedling Grapefruit tree produces a more uniform, marketable fruit than any other seedling tree we know of.

Seedling Grapefruit grown at and usually shipped from Jacksonville and Miami, Fla. (See page 8.)

Prices Seedling Pomelo (Grapefruit) Trees.

Forestry and Windbreak Trees

Camphor Trees

The tree producing the camphor gum of commerce. Grows to gigantic size. Valuable as a wind-break, for hedging, and yard shade trees.

Our supply of Camphor Trees are grown at, and will usually be shipped from our Jacksonville, Fla., and Port Arthur, Texas, Nurseries.

History of Camphor Tree Shown on Cover of this Booklet

About twenty-one years ago, Mrs. J. P. Runfroe, of Richland, Pasco Co., Fla., secured a small Camphor tree by mail through the Department of Agriculture at Washington, D. C., and, thinking it would grow into a little evergreen shrub, planted it in a flower bed in her yard. For the first year or two the tree did not make much growth, but once it became firmly rooted and established in its new home it began to shoot upward and unfold its graceful branches covered with glossy green foliage, and, in place of a shrub, began to take on the proportions of a beautiful tree. Had they wished to keep it down to a smaller size, it would only have been necessary to have trimmed and sheared it once or twice a year. Not knowing this, Mrs. Runfroe let it grow on from year to year, crowding back the shrubbery and trees planted in close proximity to it, until it assumed the gigantic proportions as shown in the illustration. The tree has a base of over 5 feet diameter at the ground, a height of about 70 feet and a spread of about 80 feet, and forms a perfect rounded canopy of living green.
